

MAIN PROJECT EMAIL PAGE

REQUIREMENTS

Create a page that includes an email link

Due

In order to receive a grade for this assignment you need to have the pages on the server by the designated date and have completed all of the following requirements

Create a page with a working email link

This page needs to include more than just the email link.

MAKE THIS PAGE FUN AND INTERESTING

CSS

Must include comments

Must be linked from page

All styles and positions

Needs to have styles for menu

Meta Tags

This page must include Meta Tags for:

Author

Keywords: about 15 - 20 words

Description: description of your site about 15 - 20 words

W3C

You need to have your page validated at W3c (combine this validation with the rest into one pdf)

<http://validator.w3.org/>

Upload

This page the CSS and the W3C validation need to be uploaded to your server space.

Test

Once your page and W3c are on the server test to make sure everything works

Must work in all browsers and both platforms
