

Student Web Portal

All WD&IM students are required to have a portal page that is linked to all of their projects and required documentation, this includes tech electives and independent study.

Students will create the portal page in imd110 and are expected to keep it up-to-date for the rest of their time at AIW. *(students are required to have a portal page in both imd100 and imd130 but these pages only need to have links and are not designed)*

Student urls will not be added to the portal page list until they have completed the redesign in IMD110.

Portal Requirements

The portal page must be well designed and easy to maintain.

The **PORTAL PAGE MUST BE ONE PAGE ONLY** all information in addition to the main project and documentation (assignments etc) must also be linked from this page. Assignments can be removed at the end of each quarter.

Work from Design Classes

Each student is required to include at least 3 pieces, at least one from each design class. P104, ART122, GD241 more if possible. This section is only required for students entering IMD110 spring 2010 or later.

Work from IMD Classes

You are required to have work from all classes except IMD450.

Required Information

There needs to be separate sections for each class.

Each section needs to include:

Class number

The name of the main project for that course

The purpose of the project (keep it short)

The intended audience

Tone of the site

The technology used to create the main project

A link to the main project

A link to the process book

A link to the w3c validation (not required for flash)

Any passwords and user names that are required to enter a section of a site (not needed on the portal page if they are supplied on the page of the site)

IMPORTANT Redesigning Projects

Students that redesign a project or change a project's technology need to link to both the original project and the revamped project.

Changing Your URL

If you want to place your work on your own server you need to fill out a form with the new url.

Go to: <http://wdim.desplechin.com/portals.php>

Also check to make sure that your url is listed and is correct if not fill out and submit the form with the correct information.

IT IS THE PART OF THE REQUIREMENTS FOR ALL CLASSES THAT STUDENTS COMPLY WITH THE PORTAL PAGE REQUIREMENTS
